

# Transport Automation, Operations Management & Outsourcing Services

# is your business as powerful as it can be?

In today's fast paced world, multinational companies want sourcing partners who help them innovate, streamline operations and create value for their business, while optimizing costs.

Pratyaya Consulting is here to help multinational businesses like yours work in new ways – internally and with your network of suppliers and customers. With the combined experience of GeoEdge, we bring together high performing and secure **Transport Automation & Management solutions** that are easy to implement and use in your local office and around PAN India.

Pratyaya Consulting specializes in Enterprise Solution on Transport Automation and Management. This means when you outsource to us, we go the extra mile to keep you agile, flexible and efficient. We can take responsibility for all or part of your Enterprise and IT infrastructure for Transport applications, security and Operations management. Most of today's leading multinational companies already in the process relying on us to manage their Transport Management regionally and PAN India.

We help you with your evolving requirements, too. Consolidating existing arrangements through a centrally managed Transport Management to give you better control, new functionality and cost savings. Or aligning new acquisitions that have disparate IT systems. With Pratyaya Consulting Services you deal with a single partner who can bring a local level of service and a truly global perspective.

# why choose Pratyaya Consulting?

Transportation is central to any organization, and it's becoming increasingly complex as business Dynamics and Changing City Dynamics make it integral to business and support processes and success. But are you aware of all the possibilities? Is your staff trained to support the latest demand and dynamics? Do you have the in-house resources to develop, or even identify, the next Complexity that will change your landscape?

If you are looking to outsource, you need a partner you can trust. A partner that has experience with companies just like yours.

At Pratyaya Consulting, we work across all industry sectors, from finance, manufacturing and retail to government and administration. We operate the world's most effective automation with integrated Solutions to keep your applications up and running. And we invest extensively in R&D to keep you on the leading edge.

Our customers have outsourced critical sites to us, in more than one cities in PAN India. We have been managing Transport Automation and IT outsourcing for global leaders.

## simplicity

We know that senior IT managers identify complexity as a major concern. Our consultants can bridge the gap between business and technology with their experience designing solutions that reduce management complexity while improving your Operations Efficient, Process Compliance and Resource and Cost Efficiency .

## leadership

You will benefit from the latest innovations. Through GeoEdge's leading research, which employs 70 technologists on Coimbatore R&D center, we are already investing in your future – with a growing annual R&D budget .

## coverage

We can support you wherever you plan to do business. Our network covers PAN India territories. And our PAN India deployed team consists of 25 dedicated outsourcing experts, supported by specialists in consulting, project, service and IT management.

## integration

No matter how many different aspects there are to your Transportation and IT needs, we can integrate them all into a single solution, managed seamlessly. Regardless of the number and disparity of sites, they can all be encompassed in one global agreement, supported locally.

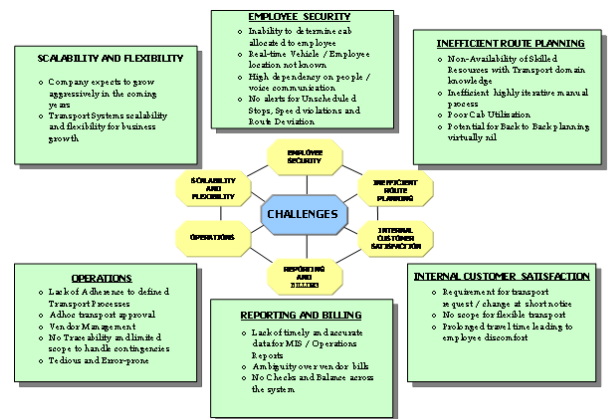

# how do we approach outsourcing?

Understanding, openness and flexibility are fundamental to building a successful partnership from initial inquiry to implementation and beyond. Ongoing communication is key to designing, implementing and managing an outsourcing partnership that meets your requirements today and as your business evolves.

## every customer is different

To design your unique solution, we start with a thorough assessment of your entire business and Transport environment.

At Pratyaya Consulting, we know you expect more than just a lower total cost of operation. We can add value in different areas such as higher IT and Transport integration, improved Operations performance and compliance. That's why we work closely with you to determine your specific needs, starting with a Joint Opportunity Assessment.

Through this assessment we explore the full potential of our respective capabilities, learn more about your expectations and assess how we can work together to produce the best results.

## making it a success

our technology-agnostic approach assures you of the best solution for your situation

## when designing your solution, we will:

- examine the competitive drivers impacting your industry
- evaluate your Transport needs and Operations from technical, commercial, organizational and business perspectives
- identify "quick wins" for immediate cost reduction
- create an implementation roadmap to achieve long-term value

## due diligence

We've developed tools to efficiently collect and analyze data for large-scale operations. These allow us to determine the proposed cost savings and the legal and contractual framework for our agreement.

## transition

A detailed plan will outline every step of transferring responsibility for commercial, technical and operational management of your Transport infrastructure to our team. Planning is critical to assure continuity of your Transport Operations and your business.

## vendor management

We have relationships with Cab vendors, and our partnerships with key Hardware providers enable us to deliver complete, globally integrated solutions.

## transformation

Count on us for a smooth migration to your new Transport Automation and Management platform. We'll establish a complete change program working with your management team. Changes will be managed within the context of your IT governance or change control framework. A systematic execution of the transformation is the key to a win-win partnership.

## teaming

Together, we can leverage our total resources to effectively manage your global/Local Transport Operations and IT infrastructure. Working as a team, from finance to legal and from human resources to IT, we can manage your costs and risks – reducing your effort and investment. Ongoing teamwork will enable us to adapt your solution to new requirements and business goals.

# your business benefits

## a single solution

We will provide one contract, one platform and one service agreement PAN India for the end-to-end management of your Transport Infrastructure.

## access to experts

Our Professional Services team includes consultants, transition and migration managers and customer service managers. Regardless of location, our consultants and engineers speak your language and understand the local culture as well as your global perspective.

## technology leadership

We are continually optimizing your operational management and business efficiency through faster deployment of newer technologies and systems. Leveraging our technical expertise and R&D innovations, you can gain competitive advantage and improve your bottom line.

## business partnership

It's in our interest to keep improving your Employee Transportation services. We want our outsourcing arrangement to be the beginning of a long-term relationship, so we will keep working to make you faster, more efficient and more successful.
